

Spatial Disorientation and surviving the IPC Check

Spatial Disorientation is one of the leading causal factors in weather related and some nonweather related Loss of Control issues for pilots. We will discuss the basics and offer guidelines for reducing this risk.

IPC checks are a necessary and reoccurring event that if not taken seriously are ineffective in preparing you for tasks required of your abilities in IFR weather.

Directions: From Minnesota Hwy 2 or Paul Bunyan Expressway enter Bemidji Airport at Moberg Drive and follow the signs to the airport terminal building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
